

AYESHA JABEEN

DATA ENGINEER | MICROSOFT CERTIFIED

Hyderabad, India | +91 6303579834 | ayeshajabeen1012@gmail.com
www.linkedin.com/in/ayesha-jabeen-80b633249 | github.com/AyeshaJabeen10

PROFESSIONAL SUMMARY

Data-focused Software Engineer with hands-on experience in Microsoft Fabric, PySpark, SQL, and Microsoft Azure. Skilled in data ingestion, transformation, pipeline orchestration, and analytical data processing using Lakehouse, Warehouse, OneLake, and Spark. Experienced in applying Medallion Architecture, SQL-based data manipulation, and PySpark workflows for structured data processing, validation, and scalable data engineering. Strong foundation in Python, cloud technologies, and developing practical data engineering solutions.

TECHNICAL SKILLS

Data Engineering: Microsoft Fabric, Lakehouse, Warehouse, OneLake, ETL, Data Ingestion, Data Pipelines, Medallion Architecture
Programming & Processing: Python, SQL, PySpark, Spark, DataFrames, Joins, Aggregations, CTEs, Views, Window Functions, UDFs
Cloud & Tools: Azure, Azure Storage, Entra ID, Data Factory, Power BI, SQL Server, SSMS, Git, GitHub, VS Code

PROFESSIONAL EXPERIENCE

Quadrant Technologies

Software Engineer – Data Engineering

Dec 2025 – Present

Hyderabad, India

- Developing hands-on expertise in **Microsoft Fabric** for data engineering workflows, including Lakehouse, Warehouse, OneLake, Notebooks, Spark, Data Factory, and Power BI.
- Developing SQL solutions for data extraction and transformation using joins, aggregations, CTEs, views, and window functions such as LEAD and LAG.
- Working with **PySpark DataFrames** to perform data transformation, joins, aggregations, UDF-based processing, window operations, and caching.
- Building familiarity with Fabric Data Factory for data ingestion, pipeline orchestration, activities, triggers, and data validation workflows.
- Applying the **Medallion Architecture** to organize data processing across Bronze, Silver, and Gold layers, supporting structured transformations and data quality.
- Working with SQL Server and SSMS for query development, database operations, and validation of data processing results.
- Completed foundational Azure training in Entra ID, Azure Storage, networking, and cloud infrastructure, building knowledge of cloud-based data environments.

PROJECTS

Microsoft Fabric Data Engineering Capstone

Fabric | PySpark | SQL | Data Factory | Power BI

- Designed an end-to-end supply chain data engineering pipeline using Microsoft Fabric to ingest, transform, validate, and organize data through Bronze, Silver, and Gold Medallion Architecture layers.
- Ingested raw CSV data into a Fabric Lakehouse and performed data profiling, cleansing, and validation using PySpark Notebooks and SQL to prepare reliable datasets for downstream analysis.
- Implemented business transformations across Silver and Gold layers, including inventory-related calculations, status classification, delay categories, and analytical data preparation.
- Worked with Fabric Data Factory, OneLake, Warehouse, and Power BI concepts to support data orchestration, structured storage, and analytical reporting workflows.

TrafficIntelligence – Traffic Volume Estimation

Python | Pandas | Scikit-learn | Flask

- Developed a traffic volume estimation application using historical traffic, weather, and environmental data to support current and one-hour-ahead traffic prediction.
- Performed data preprocessing, exploratory data analysis, feature engineering, and regression modeling to prepare datasets and identify factors influencing traffic patterns.
- Evaluated model performance with a reported **95% accuracy** and integrated prediction results into a Flask-based application for data-driven traffic monitoring and planning.

CERTIFICATIONS

Microsoft: Fabric Data Engineer Associate (DP-700) | Fabric Analytics Engineer Associate (DP-600)

Microsoft: Azure Enterprise Database Administrator Associate (DP-800) | Azure Administrator Associate (AZ-104)

Microsoft: SQL AI Developer Associate (Aug 2026)

Other: Salesforce Revenue Cloud Consultant (May 2026) | ServiceNow CIS – Data Foundations (May 2026)

NPTEL Programming in Java – Elite (IIT Madras, 2024) | HackerRank Java (Basic, 2024) | Career Essentials in Generative AI (2024)

EDUCATION

Vaagdegi Engineering College

B.Tech in Computer Science and Engineering (AI & ML)

Nov 2021 – Jul 2025

CGPA: 7.8/10
